

ROCK COUNTY EROSION CONTROL AND STORM WATER MANAGEMENT PERMIT AMENDMENT OR MODIFICATION APPLICATION

Rock County Land Conservation Department

This application is for use only for an amendment or modification to an active permit and when the work related to this application will be completed within the original permit duration (one year from date of original permit). Examples of when an amendment or modification may be necessary are when the size or location of the construction site changes or when a substantive change is required to the construction plans on file.

Project Name: _____ Current Permit #: _____

Township: _____ Section: _____ ¼ : _____ ¼ : _____ Parcel #: _____

Landowner: _____ Applicant: _____

Landowner Address: _____ Applicant Address: _____

Landowner Phone: _____ Applicant Phone: _____

FAX: _____ FAX: _____

Person and/or Company Responsible for Installation and Maintenance of Erosion Control Best Management Practices

Name: _____ Contact Person: _____ Phone: _____

Person and/or Company Responsible for Design and as-built Certification of Storm Water Best Management Practices

Name: _____ Contact Person: _____ Phone: _____

Fee Calculation

Permit fees for amendments are based on the disturbed and/or impervious area that was not included in the original permit application fee. No additional permit fees are required for amendments or modification involving no additional project area.

Erosion Control - Additional Disturbed Area: _____ sq. ft. X \$0.005 (\$ / sq. ft) = \$ _____

Storm Water Management – Additional New Impervious Area: _____ sq. ft. X \$0.005 (\$ / sq. ft) = \$ _____

Note: Graveled areas are considered impervious areas for the purpose of this permit

Total Permit Fee (Please make your check payable to Rock County LCD) = \$ _____

As per sections 4.1109 and 4.809 of County Ordinance, all fees shall be doubled if work is started before a permit is issued

- All requirements on this application correspond to the requirements set forth in Erosion Control Ordinance, Chapter 4.11 of the Rock County Code of Ordinances, and Storm Water Management Ordinance, Chapter 4.8 of the Rock County Code of Ordinances.
- By submitting this application, the applicant and landowner certify that all land disturbing construction activity will be conducted in accordance with the provisions of an approved or amended permit.
- Submitting this application authorizes Department Staff to enter the property to obtain information, conduct inspections or make curative action.

Landowner or Applicant Signature: _____ Date: _____

(If applicant is not the landowner, attach a notarized statement authorizing applicant to act as landowner's agent)

Amendment approved by: _____ Date: _____

Revised January 2014

Description of Proposed Amendment or Modification

Reason for permit amendment or modification (check all that apply):

____ Change the in area affected by construction

____ Request change to approved construction plan

____ Other: _____

Revised construction plans or other written documentation may be necessary to complete this application. When preparing an amendment or modification the following details, at a minimum, should be included in the plan if not already on file. Please review to the original permit application materials, permit conditions and/or the applicable ordinance standards for reference.

Details for All Permits:

- The start and end dates of land disturbing activities at the site.
- The intended sequence of major land disturbing activities at the site, including stripping, rough grading, construction of utilities, infrastructure, and buildings. Sequencing shall identify the expected date on which clearing will begin, areas of clearing, the estimated duration of exposure or cleared areas, installation of temporary erosion and sediment control and establishment of permanent vegetation.
- Estimates of the total area of the site and the total area of the site that is expected to be disturbed by construction activities. Area should be clearly shown on a plan drawing or map.
- Calculations showing compliance with the soil loss performance standards (section 4.1107 (1) (B)).
- Existing data describing the surface soils and subsoils.
- A materials list for the proposed Best Management Practices (BMPs) that will meet the minimum requirements.
- Existing topography vegetative cover, natural and engineering drainage system, and roads.
- Drainage patterns and approximate slopes anticipated after major grading activities.
- Location of all structural and non-structural BMPs identified in the plan.
- Location of all areas that will be vegetated following construction.

Additional Details for Storm Water Management Permits:

- The location and area of all proposed impervious surfaces (including gravel)
- All existing and proposed storm water management features
- Existing and proposed elevations
- Table of the Watershed subarea characteristics (on-site, off-sites and downstream hydraulic characteristics) for both pre-existing and post-construction conditions.
- Pre-existing peak flow rates at selected locations within the watershed
- Post construction peak flow rates at the above selected locations with no storm water management plan.
- Post construction peak flow rates at the above selected locations with the recommended storm water management plan.
- All assumptions used in calculations.
- Other Pertinent information concerning the recommended storm water management plan.
